Open forloop.py,   **Save As:**   **salary.py**

1. Write a for loop to print the salary from [$10,000 - $50,000] in increments of 500. Use **salary** as your iteration variable.

2. *CompanyXYZ has lifted the freeze on increments on employee's salaries, inside your for loop*:

   - **calculate the new salary** (use the variable **newSalary**) at 2% of the current salary.

   - Display the **Salary** then the **New Salary**.
