

In- Class Exercise – JS Output (console)

INSTRUCTIONS: - Read the statements below and perform the tasks.

1. Create a HTML document, save as: **Console.html**
2. Use “Console” as content of the title element.
3. Add a script section to do the following:
 - `var variablename1 = 5 + 5`
 - `var variablename2 = “5” + 5;`
 - `var variablename3 = “Hello” + 5;`
 - `var variablename4 = true;`
4. Open the browser console and write the JavaScript code to display in the console the following:
 - The value of each variable above.
 - Use the `typeof` operator to display the data type of each variable above.
