

In- Class Exercise – JS Switch

INSTRUCTIONS: - Read the statements below and perform the tasks.

1. Create a HTML document, save as: **switch.html**
2. Use **“State”** as content of the title element.
3. Add a heading element **State**.
4. Add a paragraph element with a id selector **“state”**.
5. Add a script section to do the following:
6. Prompt the user to enter a **city**.
7. Create a function called **cityLocation()**. Pass the city into the cityLocation function.
8. The function will return the State of the city entered.
 - a. Use **switch statements** that will return the city’s **state** based on the city entered at the prompt. (At least 5 cities/states options).
 - b. Include a default option.
9. Display the following in a HTML element with id selector **“state”**:
city “located in the state of “ state
