INSTRUCTIONS: - Read the statements below and perform the tasks.

Loops

1. Write the JavaScript code that will use a **For Loop** that will iterate **backwards from 10 to 1**. Output the number one per line.

2. Write the JavaScript code that will use a **While Loop** that will iterate **from 2 to 20**. Output the following one per line.

   a. For each iteration, check if the current number is odd or even, and display a message.

   For example:

   number is odd
   number is even
