

JS Random Quote Generator Project

quote.html

1. Create a HTML document, Save As: quote.html
 - a. Title: Quote Generator
 - b. In the Body:
 - `<h1>` - Quote Generator
 - Div Element: `<div id="quoteDisplay"></div>`
 - **New Quote** Button – when clicked will call the newQuote() function.
 - Script tag referencing External JavaScript file.
`<script src="javascript.js"></script>`

javascript.js

2. Open your javascript.js file and enter the following:
 - a. You should have 10 quotes in the quotes[] array.
 - b. Create the newQuote() function:
 - Use the Math.random and Math.floor to generate a number between 0-9 to access an element in your quotes[] array.
 - Using that number, display the quote in a .innerHTML element with id="quoteDisplay" in your HTML document.
