

HTML In-Class Exercise (8/23/18)

INSTRUCTIONS:

1. Open **first2.html**, save as **first3.html**
2. Go to the W3Schools HTML Tutorial website
3. READ and COMPLETE the following:
 - Click on HTML Links - **Create a List of Links**
 - READ the section on HTML Links - the **target** attribute.
 - Create a List of 4 Restaurants on Guam.
 - Each List Item should link to the restaurant's web page
 - Each link should open in a new window.
 - Click on HTML Links - **Use an Image as a Link**
 - READ the section on Image as a Link
 - Insert an image that when clicked will link to a web page and open in a new window.
 - Include a descriptive text near the image to describe what to do.
 - Click HTML Tables - **Create a Table with Data**
 - READ the section on Defining an HTML Table (basic Table construction, do not add any CSS properties).
 - Create the following Table.

Class	Personnel Cost	Facility Cost
Diabetes prevention	\$500	\$400
Adult fitness	\$2,000	\$750
Cooking and nutrition	\$200	\$3,500
Swimming	\$4,750	\$7,500
