HTML In-Class Exercise

INSTRUCTIONS:

1. Open Notepad, create and Save a HTML document as **first4.html**
2. Go to the W3Schools HTML Tutorial website
3. READ and COMPLETE the following:

   - **Click on HTML Block**
     - READ the section on the **<div>** element.
     - Use the same example on your web page.
     - Insert a **<hr>**

   - **Click on HTML Links - Create a List of Links**
     - READ the section on HTML Links - the **target** attribute.
     - Create a largest size heading of Airlines That Fly to Guam.
     - Create an Ordered or Unordered List of 3 Airlines that fly to Guam.
     - Each List Item should link to the airline's web page
     - Each link should open in a new window.
     - Insert a **<hr>**

   - **Click on HTML Links - Use an Image as a Link**
     - READ the section on Image as a Link
     - Insert an image that when clicked will link to a web page and open in a new window.
     - Include a descriptive text near the image to describe what to do.
     - Insert a **<hr>**

HTML In-Class Exercise

- **Click HTML Tables - Create a Table with Data**
  - READ the section on Defining an HTML Table (basic Table construction, do not add any CSS properties).
  - Create the following Table.

Class	Personnel Cost	Facility Cost
Diabetes prevention	$500	$400
Adult fitness	$2,000	$750
Cooking and nutrition	$200	$3,500
Swimming	$4,750	$7,500
