

# Flow Control (For loop) – random function

Chapter 02c

# Python Modules

- Python set of modules called the standard library.
- Each module contains a group of related functions.
- Can be embedded in your programs.
- Before using, must **import** the module with an import statement
- Use **help(module)** for any help on modules

# random module

- random number-related functions

# random module

```
>>>help(random)
```

random.randint

```
>>>help(random.randint)
```

random.randint() function

```
import random
```

```
for num in range(5):
```

```
    print(random.randint(1,10))
```
