

In- Class Exercise – FizzBuzz

INSTRUCTIONS: - Read the statements below and perform the tasks. Use a Function.

- 1. Prompt the user for a number, name the variable number.**
- 2. Create a function called fizz_buzz.**
- 3. Pass the number as a parameter to the function.**
 - **In the function,**
 - **If the number is divisible by 3, it should return “Fizz”**
 - **If it is divisible by 5, it should return “Buzz”.**
 - **If it is divisible by both 3 and 5, it should return “FizzBuzz”.**
 - **Otherwise, it should return the same number.**
