

In- Class Exercise – showNumbers

INSTRUCTIONS: - Read the statements below and perform the tasks. Use a Function.

- 1. Prompt the user for a number, name the variable limit.**
- 2. Create a function called showNumbers.**
- 3. Pass the limit as a parameter to the function.**
 - In the function, it should print all the numbers between 0 to the limit with a label to identify the even and odd numbers. For example, if the limit is 3, it should print:**
 - 0 EVEN**
 - 1 ODD**
 - 2 EVEN**
 - 3 ODD**
