

INSTRUCTIONS: - Read the statements below and perform the tasks.

1. Add a paragraph element `<p id="snacks"></p>`

The Lifetime Supply Calculator – Ever wonder how much a “lifetime supply” of your favorite snack is?

- Write a **<script>** to:
- Create a variable and name it **age**.
- Store your actual age number in the variable **age**. For example,
age = 21;
- Create a variable and name it **maxage**.
- Store a max age number in the variable **maxage**. For example,
maxage = 80;
- Create a variable and name it **snacksperday**.
- Store a snacks per day number in the variable **snacksperday**. For example,
snacksperday = 4;
- Create a variable and name it **totalsnacks**. Calculate how many snacks you would eat total for the rest of your life.
- Display data in a `document.getElementById` element:

You will need NN to last you until the ripe old age of X
