

Python Flow Control:

Nested ifs

Examples: **if, else – nested**

```
num = float(input("Enter a number: "))
```

```
if num >= 0:
```

```
    if num == 0:
```

```
        print("Zero")
```

```
    else:
```

```
        print("Positive number")
```

```
else:
```

```
    print("Negative number")
```

Examples: **if, else – nested**
