Python Flow Control:

more while loop

Save As: while_sumof1to10.py

TASK: **Find the SUM of numbers from 1 – 10.** Save As: while_sumof1to10.py

Pseudocode Algorithm

set the variable lastNum to 10

set the variable sum to 0

set the variable num to 1

while condition:

      add num to the sum variable

      increase num by 1 (to go to the next number)

      repeat the loop

outside the loop print the final sum (when the loop is done and you've reached 10)
