

#This program will print the numbers 10, 9, 8 to 1 and then Blastoff! using a #while loop

#initialize starting variable

num = 10

#Check the while condition if it is True, then enter the loop.

```
while num >= 1:  
    print(num)  
    num = num - 1
```

#I am outside the loop

```
print('Blastoff!')
```

Variable	Condition	True or False
