In- Class Exercise – if elif else

INSTRUCTIONS: - Calculate Total Charge and Shipping Charge for a shopper.

1. Ask the user to enter the amount for their Total Purchase.

2. If their total is under $50 add $10, otherwise shipping is free.

3. Tell the user their final total including shipping costs and format the number so it looks like a monetary value.

4. OUTPUT:

    a. **Your Shipping Charge is $_____(output with 2 decimal places)**

    b. **Your Final Total including Shipping Charge (if any) is $ _____(output with 2 decimal places)**
