**INSTRUCTIONS:  - Write while loop statements for the following.**

**Exercise #1:**

1.  Write a while loop to print the numbers 10 – 1.
2.  Then print **Blastoff!**

**Exercise #2:**

1.  Write a while loop to print only the **even** numbers from 0 – 20.

**Exercise #3:**

1.  **DO THIS FIRST**: Write a while loop to print the numbers from 1 to 100.

    a.  Inside the while loop, use **if/elif/else** and/or **logical if** statements for the following:

        i.  If the number is a multiple of three, print the number and "Tres".

        ii.  If the number is a multiple of five, print the number and "Cinco".

        iii.  If the number is a multiple of both, print the number, and "Tres Cinco".
