

## U.Commerce 7 Applications

TouchNet® U.Commerce® applications reduce the complexities inherent in processing campus-wide payment transactions. It is a technology platform designed specifically for the way Higher Education does business. But technology alone is not enough to meet today's biggest campus challenges. Technology must also be friendly and easy to use. It must deliver a superior experience for students, parents, and other constituents. In other words, it's got to support campus goals for student success. That's U.Commerce

7.

# OneCard VIP™

TouchNet® OneCard VIP™ (Vertically Integrated Platform) offers you a Campus ID Card system that runs in the cloud; stays in sync with your student information system; and manages the broad range of permissions, privileges, and authorizations required by modern campuses. It is simple, integrated, and mobile—a new generation of campus ID systems designed to keep today's smart campus at the forefront of the digital age.

## Transaction Services

TouchNet® RECON 1® delivers advanced transaction management that you can use to process, analyze, reconcile, and evaluate payment transactions campus-wide. Know the true cost of your payment processing, understand your mix of payment types, and allocate expenses based upon real cost data. Only the combination of Heartland secure payment processing and TouchNet U.Commerce gives you RECON 1, the power to know.
