Programming Project Assess Student Learning Outcome.

Create a Java program using the For Loop and Method.

The program should allow the users to enter a prompt from the select numbers in the text menu, which will bring the various results as shown in the box below.

For example, user selects the Quit option, the program shows “Good-Bye” and terminates the program.

The program displays should show the following results:

```
Select number 1,  2,  3, or Quit: 1

1

2

3

4

5

Select number 1,  2,  3, or Quit: 2

1+3+5+7+9+11=39

Select number 1,  2,  3, or Quit : 3

******

*****

****

***

**

*

Select number 1, 2, 3 or Quit: Quit

Good-Bye
```
