3020	3	MANAGEMENT INFORMATION SYSTEMS	IT Operations: For MIS to have the necessary services and resources to improve and expand cloud-based systems and to migrate candidate on-premises legacy systems into the cloud.	IT Security: To provide the necessary security and protection improvements of new and current cloud-based systems.	New and current cloud-based systems will be available 99.99% of the time, every day, and optimized for efficient and effective operations.	100% of new and current cloud-based systems will be firewalled, pentested, and restricted to authorized users only.	Systems' vulnerabilities are prevented or minimized as it relates to environmental issues, power-related problems, and natural or man-made disasters.	Robust and improved security of new and current cloud-based systems through multiple layers of industry security standards and best practices.
