

The Chill Pill.®

Have you ever felt sad and wanted it to go away?

Well this is why we have the chill pill for people just like you!

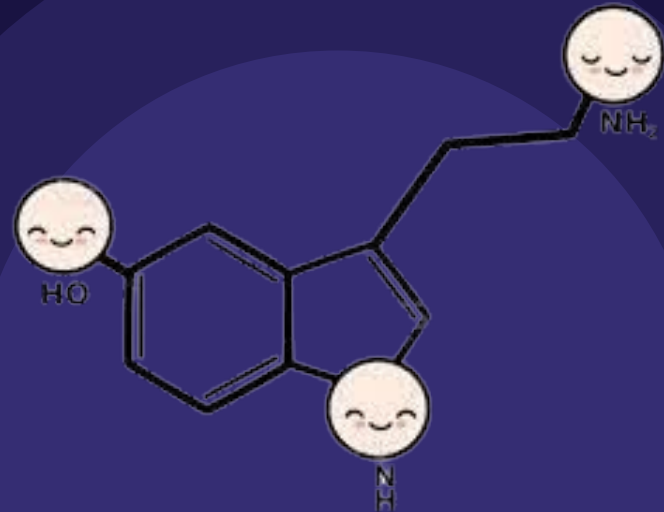

Product Description

The Chill Pill controls all your negative emotions , like anger, sadness, fear. But here's a twist, my product is not like your other antidepressant drugs or stress relievers, The Chill Pill® is just packed with serotonin. What is serotonin you may ask?

Serotonin

Serotonin acts like a hormone. It controls your mood and is responsible for happiness. It's often called your body's natural "feel good chemical". When serotonin is at normal levels you feel more focused, emotionally stable, happier and calmer. Which is what the chill pill is made for. To balance out your serotonin levels.

Pricing

325 mg for \$14.99

Should last you up till 6 hours
