Attached is a report entitled Distance Education and Student Achievement at GCC: A Summative Report which I prepared for the President and the management team.

I strongly encourage all faculty, particularly those who teach online/hybrid courses, to read this report. Similarly, I encourage concerned administrators who have a role to play in the implementation of the DE initiative on campus (either directly or indirectly) to read the report as well.

President Okada has taken action on this report, and I am now sharing it to the entire college community for a wider readership. In this light, I will release a memo in Spring 2018 to provide specific guidance regarding the action taken by the president.

I appreciate all your efforts to help our students succeed in their educational goals.

Dr. R. Ray D. Somera  
Vice President for Academic Affairs
