Subject: 14th AIAR Summary

How's this, Esther:

The Office of Assessment, Institutional Effectiveness and Research (AIER) and the Committee on College Assessment (CCA) has produced an Annual Institutional Assessment Report (AIAR) since 2001. This academic year marks the production of the 14th AIAR. This report highlights information and data specific to the College's activities related to the implementation and continuity of the GCC Comprehensive Assessment Initiative through various program review components and provides a guide to departmental planning and program changes.

The annual assessment reports attest to the College's commitment to continuous institutional self evaluation and reflection with realistic plans and initiatives for improvement. A couple of the actionable plans for improvement included in the report includes: 1. a recommendation that the Learning Outcomes Committee work directly with the Committee on College Assessment to ensure curriculum currency and alignment with semester-specific assessment requirements; and, 2. a recommendation that departments work collaboratively with workforce advisory committees for feedback on program improvement plans.

Updates:

1. An announcement via the AVP to the campus details the Annual Curriculum Review Cycle Schedule ([Annual Curriculum Review Cycle Memo](#))
2. A Workforce Advisory Committee Handbook has been completed and approved by the AVP. (I am waiting for the electronic document from Dr. Liz Diego)
