

GUAM COMMUNITY COLLEGE

College Technology Committee

February 13, 2012

MEMORANDUM

To: College Governing Council

From: Marlena Montague, Chair 
College Technology Committee

Subject: Enterprise Architecture (EA) and Information Technology Strategic Plan (ITSP)

At its February 2, 2012 meeting, the College Technology Committee approved the Enterprise Architecture (EA) and Information Technology Strategic Plan (ITSP) in its current version and as submitted by the vendor, GPSI Guam. The CTC hereby transmits these two documents to the College Governing Council for review and processing.

Charged with recommending action plans to support the technology needs and technology users of the College in promoting student learning outcomes, the CTC has agreed to extend the timeline for campus feedback on these two documents until April 12, 2012 because the information contained in each is comprehensive and extensive in detailing what the College's technology is today and what we plan for the future. The CTC has also agreed to review the EA and ITSP on an annual basis to ensure currency.

Please take note that these Enterprise Architecture and Information Technology Strategic Plan supersede all prior technology plans of the College.
