

GUAM COMMUNITY COLLEGE Council On Postsecondary Student Affairs (COPSA)

July 27, 2011

Michelle Santos, Ed.D Dean, School of Technology and Student Services Guam Community College Mangilao, Guam

Dear Dr. Santos,

In an effort to promote recycling and the Guam Community College going green, we, the COPSA Officers of Guam Community College, strongly feel that it is important that all the beverage vending machines that have plastic bottled drinks be changed out for vending machines that only dispense aluminum cans.

To initiate the recycling efforts on campus, COPSA purchased trash cans to collect aluminum cans and plastic bottles. The cleaning company empties the trash cans placing the aluminum cans in a special dumpster donated by the I-Recycle Program. This dumpster is emptied when full and the college receives funds from the I-Recycle Program for all the aluminum cans collected.

The plastic bottles are placed in a hand-made wooden crate-type dumpster. When this dumpster is full, staff and students must physically collect the bottles, unscrew any lids that were left on, and take them to a company who will send them off-island to a recycling plant. While the college is helping our campus and community in the overall recycling efforts for plastic bottles, no funds are received for these efforts.

The GCC Eco Warriors group, comprised of faculty, staff and students, was created over the last year and has done an amazing job re-painting the recycle trash cans; assisting in cleaning out the trash cans and dumpsters; and promoting recycling on our campus and in the community. They are also the lead group in organizing the collection and movement of the plastic bottles to the off-campus company.

As you can see by the attached listing of beverage vending machines on campus, one (1) of 16 machines dispenses aluminum cans only. The other 15 machines dispense either plastic bottles and aluminum cans or plastic bottles only.

We strongly urge the college to replace the beverage vending machines that dispense plastic bottles with machines that only dispense aluminum cans. This way, we cut down on the plastic bottles that staff and students must collect and deliver and we collect more aluminum cans and receive more funds from the I-Recycle Program.

We look forward to hearing from you soon. If you have any questions, we can be contacted through the Center for Student Involvement office at 735-5518/9 or by email at: ariane.nepomuceno@guamcc.edu or butgadiana.masga@guamcc.edu

Respectfully,

Ariane Nepomuceno COPSA President Butga Diana Masga COPSA Vice President

Subject: Vending Machines

Dear Ariane and Butga,

Thank you so much for your letter and I appreciate the concern the COPSA leaders have for our campus and community environment. I want to empower you as student leaders to address this issue with the College Governing Council (CGC). Your evidence is powerful. Please use your student voice on this council to seek action and allow the participatory governance process to work. Please understand you may need to reconsider the availability of water, so we may need to have an exception to the "no bottle" proposal.

Once again, I thank you for bringing this to my attention. I just spoke with the Vice President for Finance and Administration, the Chair of the CGC, and was informed they should be meeting toward the end of August or beginning of September. Please let me know if you are not satisfied with this response and we can surely set up a time to meet and discuss a plan of action.

Sincerely,

Michelle

Michelle Santos, Ed.D.
