Subject: curriculum manual

Hi Eric,
In doing the accreditation report, our LRC is real sad about the amount and quality of books they have. So I'm suggesting that in any program and course guide, especially for ADOPTION, that the departments/authors have an area there to list resources needed specifically for the LRC. It doesn't mean the College HAS to get it, because there is a part there that says "based on budget/financial support" but it would be good to have that in there. Can you guys please consider this when reviewing the curriculum manual?

Thanks!
