Hello CCS folks,

I have come up with five core values for your review and comments; some of these were brought up during our meeting this morning. In addition, I know that we have all agreed on the current mission statement for CCS; however, if I may make a suggestion, I thought that since we have a short mission statement, it may sound not so redundant if we replace the first word "success" to "achievement". This is just my thoughts!

Mission Statement: Journey with us, your achievement is our success.

Core Values

Lead	To be leaders in our community
Empower	To empower others to be productive citizens
Achieve	To help individuals achieve their dreams
Respect	To respect all cultures
Navigate	To navigate students in a journey to success

Acronym: LEARN
