

MIS FREQUENTLY ASKED QUESTIONS (FAQ)

Question: What are the computer lab hours of operation and how do I get help?

Answer:

Regular Semester hours are Monday to Thursday 8:15 AM to 9:00 PM and Friday, Saturday 8:15 am to 4:00 PM.

Summer Session hours are Monday to Friday 8:15 am to 4:00 PM.

Assistance with technical help for the computer lab is available by contacting MIS Technicians at Room 5214 at the Student Center Building or by calling 735-8885/8884/5619. Technicians are available Monday to Friday from 8:00 am to 5: 00 PM.

After hours and Saturday, technicians are available by contacting 735-5619 or Student support services at 735-5555.

Question: What do I do if system won't power on or nothing displays on screen?

Answer:

If there is no power lights on the monitor or PC tower ensure that the UPS (battery backup) is Powered on. The UPS should have a solid green status light. If the UPS is powered on and displays a green solid light, check to see if power cords behind the monitor and PC tower are seated all the way into the socket and fits snugly and securely. If problem still persists or UPS does not show a solid green light status, please notify MIS by sending a work order. Refer to how to send a work order.

Question: How do you send a work order for MIS Technical Support?

Answer:

Send an email to work.order@guamcc.edu and include a detailed description of the issue you are having, be it a general technology request, or problems with computer systems. Include your name, room number, building number, and department, as well your contact information. This will ensure prompt service and a method for MIS to track and document work requests.

Question: What do you do when the Printer at student Center Lab display paper Jam Error.

Answer:

Do not attempt to remove or fix paper jam as this may cause further damage to the printer. Notify MIS technicians at room 5214 at room 5214 or call 735-8885, from the hours of 8:15 am to 5:00pm. If no answer at room 5214 or with phone number 735-8885, call MIS at 735-5619.

Question: Why don't I have Internet connection?

Answer:

For STAFF OFFICES – Check to ensure Ethernet cable is hooked properly to connection behind the computer and on the wall network outlet.

For Computer Lab Users at Student Center Lab and Library – You should contact MIS at 735-8885, 735-5619, 735-8884.

Question: What do I do if I can't hear sounds from my computer?

Answer:

If at the Student Center Lab and cannot hear any audio instruction.

Please check if headphone is plugged-in to the green audio port in front of the system and ensure that headphone is turned on, and please check and ensure that speaker/audio control on the lower right-hand screen is not on mute. If it is please click on the unmute button to enable the sound. If sound is already

unmuted and audio is still not working, please contact MIS at 735-8885, room 5214, MIS room D5 735-5619, and Learning Resource Center, 735-8884, MIS room D1 735-5511.

If you are staff and are experiencing sound problems, please check if headphone is plugged into the green audio port in front of the system and ensure that headphone is turned on, and please check and ensure that speaker/audio control on the lower right-hand screen is not on mute. If it is please click on the unmute button to enable sound. If sound is still not working, please send a work request to work.order@guamcc.edu and also copy gcc.mis@guamcc.edu so Management Information Systems personnel are aware of the problem.

Question: Can students and staff install software outside of GCC's specifications?

Answer:

No. If you are a student and are in dire need of installing software for class/homework purposes, check with your instructor so your instructor can contact the Department Chair and the Department Chair can contact the Management Information Systems administrator. If you are a staff, please check with your supervisor so your supervisor can contact the Management Information Systems administrator.

Question: Can I just simply call or knock at any MIS office for any computer problems if I am a GCC employee?

Answer:

No. This FAQ document will hopefully help you out with some of the most common problems so that you will not have call or knock at any MIS office for any computer problems. The purpose of this FAQ is to reduce or eliminate the need to call or submit a work order to MIS for very common computer-related problems at GCC. Additionally, MIS personnel do not work on or entertain problems with personally owned devices. For all work-related computer, network, or Internet problems, etc., it is best to submit a work request to work.order@guamcc.edu and also copy gcc.mis@guamcc.edu so that all Management Information Systems personnel will be aware of your problem while or even before the Work Order is dispatched.

Question: There are different browsers loaded in the Student Center lab, can I use any of them to access MyGCC?

Answer:

You can use any of the loaded browsers in the Student Center lab; however, the recommended or preferred browser for GCC is Google Chrome.

Question: How do I change my security questions and answers for MyGCC?

Answer:

- 1st Login to MYGCC Portal
- 2nd On the top left hand corner click the "My Account" link
- 3rd Under the "Setup Security Question and Answers" click the "Click Here" link
- 4th You can now change your security questions and answers, then click "Submit Setup" when done

Question: How many login attempts do I get before my account is locked or disabled, and what do I do if my account is locked or disabled?

Answer:

Secure Access Login

User Name:

Password:

[Having problems logging in? Click here.](#)

[Forgot Password?](#)

You have 3 login attempts before your MyGCC Portal account gets locked or disabled. If this happens to you and you have gone through the process of the "Setup Security Question and Answers" (as explained in the FAQ item immediately above), then you can reset and unlock yourself by clicking on the "Forgot Password" feature on the login page of MyGCC. If you are a student and you did not do the "Setup Security Question and Answers", please call the Registrar Office at 735-5531, but if you are an employee, please call the HR Office 735-5538, to have your account unlocked and enabled.

Question: How do I change my MYGCC password?

Answer:

- 1st Login to the MYGCC Portal
- 2nd On the top left hand corner click the "My Account" link
- 3rd Under the change password box enter your "Current password", "New Password", "Confirm password", and follow the password requirements to the right of the password box.
- 4th Click the "Save changes" button on the bottom left hand corner when you are done.

Question: What do I do if I'm a faculty and I receive a bounced email from students due to "email not found" error?

Answer:

This happens when the student's email address is not yet activated by the student, which is needed by Gmail to detect and create a new and active address. To activate and have Gmail create the student's email address, the student must click on the "Email" icon upon initial or subsequent login to MYGCC portal. Student must wait at least 10 minutes or less to re-login to MyGCC and check on his/her email account. If email still has not been created, please e-mail gcc.mis@guamcc.edu or contact GCC MIS at 735-5511 for further assistance.

Question: Why are some emails that I sent or sent to me not being received?

Answer:

If using Microsoft Outlook, check if email is in Junk folder of Outlook. If found, right click on the message and choose "Not Junk" option so that Outlook treats similar messages as not junk the next time you receive them. If in Gmail, check if email is in Spam folder of your Gmail. If found in Gmail Spam Folder, click "Not Spam" icon so that the email will not be tagged as spam the next time. This will also move the email to your inbox folder.

Question: Why is student missing MyCourses Tab in MYGCC?

Answer:

This happens when the student does not have a "Student" role in its account profile in MYGCC. Inform Admissions and Registration Office about the missing MyCourses Tab and they will verify if the request is valid. If valid, the Admissions and Registration Office will inform MIS to enable the "Student" role in MyGCC for the student in question. If not valid, Admissions and Registration Office will work with the student to resolve the problem.

Question: Does GCC have an Internet policy?

Answer:

Yes, [Policy 197 – GCC Online Policy & Procedures](#) which is available for viewing at the Governance tab of the MyGCC portal.

Question: What do I do if I can't connect to the internet?

Answer:

What may seem to be a network connection problem - is sometimes simply a Website being temporarily offline. Before assuming your Internet connection is faulty, try visiting several popular Websites rather than just one. If you are able to access other websites, more than likely the site you are accessing is temporarily off-line. All you can do is to wait and try to access the website at a later time.

Also, check to see if others in your area or in close proximity are experiencing the same problems you are having. In most cases, simply restarting your computer will fix the problem, especially if others can connect to the Internet. If none of the above works, call and report the issue to the MIS department at 735-5619. Once Internet connection has been established, report the issue by emailing the problem to work.order@quamcc.edu and indicate connection has been restored.

Question: Does GCC have a Wi-Fi wireless connection open to the public?

Answer:

Yes and No, depending on your location. The broadcast name is GCC Wireless and is accessible from most areas within the campus. If Internet access is allowed without a password, then you may be accessing an Open wireless service nearby, but if access is prompting for a username and password, then you will be required to enter your MyGCC username and password to use the Internet.

Question: Does GCC have community computers available on campus for public's use?

Answer:

Yes, upon entering the Learning Resource Center (LRC/Library) the first ten (10) workstations are open for All students and non-students of GCC. You can inquire at the Library front desk or contact GCC Library at 735-0228 or email at gcc.library@quamcc.edu for further assistance.

Question: I want to use Google Chrome and I understand there is a way to set up my account for easy login or sign in. How do I sign in to Chrome?

Answer:

1. Open Chrome browser
2. Go to Settings
3. Click Sign in to Chrome
4. Enter your MyGCC login
5. Done

Question: How do I create an account in Google Chrome?

Answer:

This is useful to manage multiple logins for instance your account and a group account.

1. Open Chrome browser
2. Go to Settings
3. Scroll down to "Users"
4. Click "Add new user"
5. Enter name for user & icon (optional)
6. Click "Create"
7. You will be presented with a login screen, enter your GCC e-mail address and password and sign in
8. Done

Note: User accounts will be separated by window.

Question: How can I tell what is legitimate email or a phishing email?

- a. You are not expecting it and if an email is soliciting information that is personal, sensitive, asking for money, asking your PIN, password, or asking you to go to a suspicious

website with a very long link, then it is most likely phishing or fake email. For example: Nigeria Banking, USPS tracking, IRS, other colleges and university e-mail systems, and real or fake services such as bank or insurance names are being used.

Phishing emails are often sent from addresses that look official.

Clicking on this link would take you to a fraudulent website with a form to enter your personal information.

Notice that the URL does not direct you to an official IRS website.

c.

- Please check email address of the "to" and "from" headers.
 - Most of the time the email address is sent to group email addresses.
- Most viruses come thru email solicitations via links and/or from automatic or manual downloading of web content.
 - Delete the email and do not do what the email is requesting.

Question: Is the Internet or network down?

Answer:

Please read check list below for solutions (network connection solutions)

Go to the back of your computer and check the blue, white, or gray cable that has a similar connection

like the telephone connection but bigger.

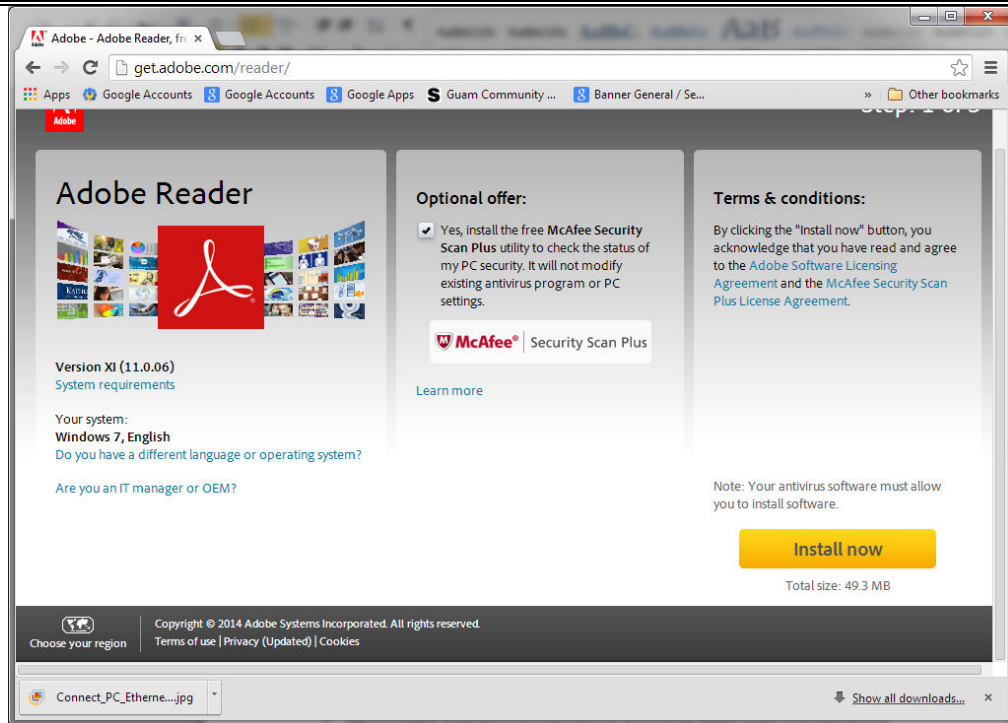

Check if there is green or amber light on the end of the cable. If there is green or amber light then you are connected to network. Reboot your computer and try again. If this suggestion fails, please call MIS at 735-5511 or 735-5619.

If you are on Windows XP look for two monitors side by side on the bottom right corner of your desktop. If there is an exclamation on the two monitors please check the internet cable on the back of the computer and check if there is green or amber lights flickering. Please check another machine and see if there is internet access. If there is internet access from another computer in your area, reboot your computer. After reboot and your computer does not have internet access please call MIS at 735-5511 or 735-5619.

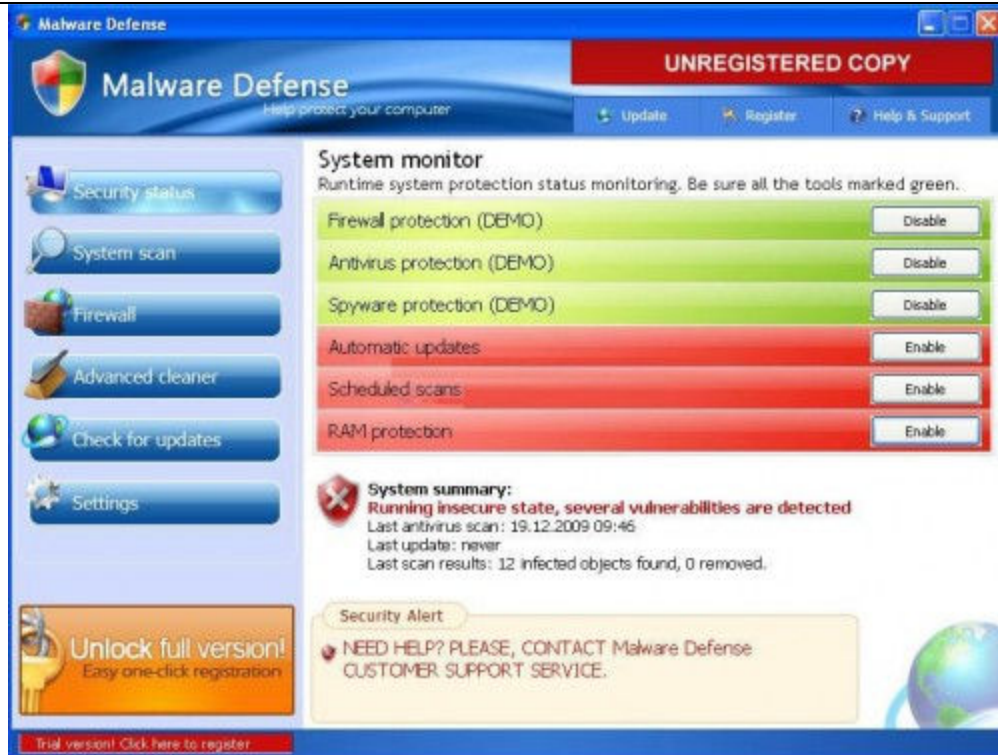

Question: What do I need to understand when installing programs downloaded from the Internet?

Answer:

Many programs from the Internet are legitimate such as applications Adobe Reader or Google Chrome, but sometimes there is a secondary program installation like another antivirus like McAfee, or utilities like search engines, toolbars, quick links, etc.. Google and Adobe are legitimate websites however, there are other sites that are not and will allow you to download games for free, or download free applications, computer repair software tools, screen savers, even browser toolbars, etc., but may actually have adware, spyware, or malware that can work behind the scenes without you knowing or installing applications that take over your computer and its resources. The recommendation is not to install any program that you are unfamiliar with or that you do not need. Contact MIS if you have any questions about a program and we will do our best to assist you. Read further below:

- a.
- b. Google and Adobe are legitimate sites.
- c. All the PC workstations in Guam Community have Symantec antivirus installed.
 - i. You do not need install a second antivirus.
- d. Most if not all PC workstations have Google Chrome installed.
- e. Please read every option of what you are installing and the secondary applications that may or may not be related to the application. Do not just install free applications.
- f. Remember free applications may contain adware, spyware, malware or a virus.
- g. Read what you are installing before actually installing the application, there may be hidden options or options that are automatically chosen or marked. Unmark them if you can, BUT if you CANNOT then it is best to cancel the installation.
- h. Below is an example of a malware virus.

i.

Question: What is VoIP?

Answer: VoIP is an acronym for Voice over Internet Protocol. The Wikipedia definition is: Voice over Internet Protocol (VoIP) is a methodology and group of technologies for the delivery of voice communications and multimedia sessions over Internet Protocol (IP) networks, such as the Internet.

Question: What telephone system does GCC have?

Answer:

The majority of the Mangilao GCC campus runs on Plain Old Telephone Service POTS. GCC does have VoIP but limited to certain buildings only. It has been the trend for new buildings to have VoIP upon opening; this is true for all new builds with the exception of the Allied Health Center, which runs on POTS. Buildings that have VoIP services are the Learning Resource Center, the Student Center and the Foundation Building and buildings under construction or renovation will most likely have VoIP installed.

Question: Is the remainder of GCC campus “ready” for VoIP?

Answer:

Some areas are more ready than others, most areas need network switches upgraded to support VoIP, while others require a router upgrade or network cabling upgrades.

Question: Are “extensions” possible with VoIP?

Answer:

Generally extensions are not supported. Not with our current set-up anyway. In a VoIP set up every phone has its telephone number “programmed” into it. This means that you could not move a phone from one place to another or “swap” phones should it malfunction.

Question: If VoIP telephone services do not run on “inside wire” how does it work?

Answer:

VoIP works via your campus/office network, the same network that your computers use! Generally, VoIP services run on a dedicated network exclusively for voice services.

Question: Other than “new” buildings, what areas or locations can expect VoIP services in the near future?

Answer:

Some areas are ready now but most areas need switch upgrades. Admin & the Tech Center buildings are VoIP ready with the proper network switch upgrades.

Question: How to delete a large file attachment on an e-mail message that’s stuck in Outlook Outbox?

Answer:

1. Have user disconnect network line from computer (at front tip of line connection to computer, push tiny lever of connector down and gently pull out cable)
2. Close Outlook (If prompted, choose option to “Exit Without Sending” and/or “Close Program”)
3. Restart Outlook
4. Go to “Outbox” folder of Outlook
5. Right-Click and choose option to “Delete” and message should disappear
6. Deleted message will now appear in the “Deleted Items” folder
7. To permanently delete all items in the “Deleted Items” folder you need to right click on the “Deleted Items” folder and choose option to “Empty Folder” and then click on “Yes” (Warning: MAKE SURE YOU ARE IN THE “DELETED ITEMS” FOLDER)
8. Done
9. Reconnect network wire to computer
